## Profile

Experienced Full-Stack Software Engineer with 9 years of experience working with Angular and .Net. Adept in bringing forth expertise in development and software system design. Looking to obtain the position of Senior Software Engineer in a fast-paced tech environment to learn new technologies and utilise well honed skills in designing and implementing solutions for the web. Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team.

## Work experience

### Phinsys Ltd (London, Insurtech)

2022 - Software Engineer

Working on the reimplementing of the flagship data warehousing product. Responsible for delivering key features: a diagramming tool for defining ETL processes, code editors with custom language features, bespoke and standard form controls using Angular and other features spanning from database to frontend. I'm also researching introduction paths for **Angular Signals** and recently proposed **Control Flow Primitives** into development.

Technologies used: **Nx, Angular 14+, .Net 7+, SQL Server** and **Azure**.

### This is Motif Ltd (London, Market Research)

2020-2022 Software Engineer

2022-2022 Development Manager

Instrumental role in designing and implementing software solutions for delivering and presenting market research data. Responsibilities included designing and implementing features and modules for multiple client facing reporting and content management systems and an internal project management system. In 2022 I became responsible for managing software development within the company.

Highlighted responsibilities and achievements:

- Lead developer of the flagship content management and reporting system: I was responsible for managing feature and change requests for the flagship content management system used for both presenting research results on customisable report screens and managing sample data. I initiated and led the migration to the latest technologies.  
Technologies used: **Angular 10-14, .Net 6, SQL Server, Cosmos DB, DevOps** and **Azure**.
- Lead developer of a sample processing workflow system: I was responsible for implementing optimisations and new features for a system which is used for processing sample files with high throughput. Also implemented a dashboard module using **Angular** to display detailed metrics on survey responses and processes.  
Technologies used: **Angular 10-14, .Net 6, Azure Functions, SQL Server, Cosmos DB, DevOps** and **Azure**.
- Full software redesign of an internal project management system: Managed to improve code quality, maintainability and extensibility by a large margin. Initiated the reengineering and migration of this system from .Net Framework and AngularJS to **.Net 6** and **Angular 14**.  
The project resulted in significant performance and UX improvement for users.

### L&M Solutions Consulting (Budapest, Consulting)

2015-2017 Part-time Software Engineer

2017-2019 Project Manager, Software Engineer

Worked on several large enterprise web solutions as a full-stack engineer and as project manager on multiple others. Altogether I was involved in the whole software delivery lifecycle, including requirement analysis, system

---

design, hands on coding, managing development and project progress, presenting results to stakeholders, documentation and deploying solutions.

Clients included a major Hungarian bank, a German automotive company, Central European oil and gas supply companies among others.

Highlighted projects:

- Lead developer for an Automotive manufacturing support system: Architected and led the development of an automotive manufacturing quality test management system with complex user interfaces and workflows for one of the major automotive brands. Worked productively with clients to understand requirements and user needs, was able to keep balance between speed of delivery and quality, while meeting high level security standards.  
Technologies used: **Angular 4, .Net Framework, SQL Server**
- Intranet portal for one of the largest banks in Central Europe: Developed several software components for creating, targeting and consuming news articles, recommendations and social network features using SharePoint's SPFx and React with TypeScript. I was able to learn React within a very limited timespan and build high quality, highly scalable applications matching high UI/UX standards.  
Technologies used: **React, SharePoint, SPFx**
- Full-stack application framework to bolster delivering projects on a fast pace: Architected and lead the development of a front-end framework as part of a full-stack framework. I built a reusable component system using Angular that comprises of multiple high quality components, services and modules. This framework has been used for delivering numerous solutions of small to large scale.  
Technologies used: **AngularJS-Angular 4, .Net Framework, SharePoint, SQL Server**

## Skills

### Technical skills

Proficient with:

- .Net, .Net Core, C#, Angular, CSS, Sass, MS SQL, Azure, Git, Agile Development, Web Application Design and Architecture, Responsive and Adaptive UI Design

Familiar with:

- React, Webpack, SharePoint, SPFx, MongoDB, CosmosDB
- CI/CD, UX

### Soft skills

- Commitment to delivering value
- Active learner and writing blog post)
- Technical leadership
- Team-oriented: Making the most out of collaboration, can give constructive, beneficial feedback
- Ability to communicate engineering concepts to technical and nontechnical stakeholders
- Ability to handle multiple workstreams and prioritize accordingly
- Good balance between quality and speed of delivery

## Education

**Óbuda University, Budapest**

Bachelor of Science in Engineering Information Technologist (2017)

## Interests

Software Design and Architecture, Software Security, UX, Science
